# Configure existing tools or products

Ulf Kronsell - 2025-04-24 - Configure Existing Tool or Product

Every now and then you need to reconfigure your existing tools or/and products. The most common changes are:

### 1. Adjust the price for your tool.

Click **Tools**, then the tab **Sales** and there you select the product that need to be changed. Please note that all existing subscriptions does not change, if you want to change in a subscription you need to go to **Licence management/Subscription**, search for the subscription and then click the **Edit** button.

_	EDI	TSUBSCRIPTION	-	
E Licence management /	Specify monthly in 12	iterval		
	VAT rate 25%	•	until the subscription is rem is included. s that provide access to the	oved. Below is a tool in Skolon
Edit Remove		Cancel Save		
Licence type S	chool	Tools	Licences	Av
• · · · · ·				Students.

### 2. Change the product to be automatically renewed.

Click **Tools**, then click the tab **Sales** and select the product that you want to change. Scroll down and make sure the button **Turn on manual managment** is **not** activated.

### 3. Change the information that is presented in the Skolon library.

Click **Tools** and then click the tab **Language**. When you click you can either change the name of the tool, short description or/and long description.

		Market 🕕	Sales ()	Media	Deep links	Reviev

Sed ut perspicia inventore verita fugit, sed quia c	atis et quasi architecto l consequuntur magni dol	ores.				
Sed ut perspicia inventore verita fugit, sed quia c	atis et quasi architecto l consequuntur magni dol	ores.				

## 4. Change the tool icon, tools page and/or Screenshots for your tool

Click the **Media** tab. The tool icon should be 240\*240 px, in jpg,-format. Image for the tools page, 1280 x 360px in jpg- or png-format. Screenshots should be 1280\*1080px, in jpg-format.

#### 5. If you have tools in several markets in Skolon, please notice:

A: Company description and logo are common for all markets, they are changed under **Settings/Company settings**.

B: You can have a separate support link for each market. These are set under **Settings/Company settings**.

C: Rules and terms is common for all markets as default. If need be, you can add separate

Rules and terms for each tool under **Tools/Information**.

D: Media is the same for all markets so if you need to have separate pictures, you need to create a new tool for that market.
