Setting up product with price per year

Ulf Kronsell - 2025-04-02 - [Tools](#)

It is now possible to set up products with a multiple year/period duration and invoicing once every year/period. You can have different price for different periods.

To create a product with a multiple year/period yearly invoicing select the Sales tab and then the market and product for which you want to add the product.

Click New product, select the licence type, then toggle the “Activate price per year” switch. Select the length of the licence, example 3 years.

Fill out the price information for years 1-3. Click **Save**.

The screenshot shows the 'The Price per year-tool' interface. At the top, there is a navigation bar with tabs: Information, Language, Market, Sales (highlighted with a red box), Media, Deep links, and Reviews. Below the navigation bar, the title 'Edit "Organisation licence" for "Sverige"' is displayed. The main content area is divided into two columns. The left column, titled 'Licence information', contains a 'Licence length' field with the value '3' (highlighted with a red box), a 'Duration' dropdown menu set to 'Year(s)', and an 'Activate price per year' toggle switch (highlighted with a red box) which is currently turned on. Below this is an 'Advanced settings' section with an 'External ID for the product' field. The right column, titled 'Choice of prices', contains a 'Set a price for the licence' section with the text 'The licence can be used by all users' and a radio button. Below this are three input fields for 'Year 1: 1000', 'Year 2: 1500', and 'Year 3: 2000' (all highlighted with a red box). Below these is a 'Select VAT rate' dropdown menu set to '25%'. At the bottom, there is a section for 'Price is provided upon request' with a radio button.

If you want the product to have price upon request, use these settings instead.
